

About Us

Our PPEC program is committed to providing a safe, nurturing, and creative learning environment for children with complex medical needs. We are committed to maximizing the personal growth and individual development of each child. We provide specialized services and expertise to help achieve those goals.

The PPEC child development program is dedicated to achieving its goals through the provision of a safe, nurturing, and healthy environment that fosters love, security, acceptance, values, self-control, independence, protection, and guidance for each child. Maintaining quality and individualized care is a priority, reflected in carefully managed staff-to-child ratios. The program focuses on the holistic development of each child, addressing individual needs in social, emotional, physical, and mental skills, and creating opportunities for children with diverse abilities to participate together.

CREATIVE DAY

**Prescribed Pediatric
Extended Care**

What We Do

Creative Day is a Prescribed Pediatric Extended Care (PPEC) Center that is prescribed for Medicaid eligible children, 6 weeks to 21 years of age, with complex medical conditions.

The purpose of the center is to provide an inclusive, comprehensive child development experience in collaboration with our traditional child development center, CREATIVE BEGINNINGS. Our program ensures quality, innovative educational programs and customized medical, nursing, and therapy services.

Philosophy

The PPEC program aims to promote the overall development of children by focusing on their cognitive, emotional, and physical growth. It prioritizes independence and maximizes each child's functionality and potential. The program provides individualized, high-quality care and collaborates closely with families to ensure that their concerns, priorities, and cultural values are integrated into the child's daily activities. The environment is designed to be opportunistic and enriching, and active participation in care and learning experiences is encouraged for each child. Our staff members are regularly provided with professional development opportunities to maintain the program's high standards.

The following medical conditions may be covered:

- Cerebral Palsy
- Spina bifida
- Agenesis of corpus callosum
- Visual impairments
- Hydrocephalus
- Seizures
- Down Syndrome
- Muscular Dystrophy
- Diabetes
- Severe Asthma
- Bronchopulmonary Dysplasia
