

## About Us

Providing Occupational Therapy, Physical Therapy, and Speech Therapy for children of all ages from infancy through adolescence, this program addresses cognitive, physical, communication and developmental needs of each child. The therapists work collaboratively with the child's family support system, medical team, educational team and other support systems as needed to insure a well-rounded program.

 Humana  
 Aetna Better Health  
 Passport  
 Caresource  
 Wellcare  
 Humana  
 Cigna  
 Wellcare Medicaid  
 United Healthcare  
 Kentucky Medicaid

### Feeding Program

We offer an interdisciplinary approach to the assessment and treatment of feeding and swallowing disorders. Assessments are conducted by an Occupational Therapist and/or Speech Language Pathologist to assess skills across the full continuum of the feeding process, including the sensory, oral motor and swallowing components. When needed, we also have the ability to incorporate Physical Therapists to assist in appropriate positioning, seating options, and strength/stability required for successful feeding. Our therapists utilize a variety of approaches to assess and treat each unique child in order to safely meet nutritional needs for growth and development and optimize their participation with feeding, and family mealtimes.
