

WHAT WE DO

Our **Occupational Therapy** treatments help children overcome sensory challenges and build self-regulation skill sets.

Our **Physical Therapy** treatments provide one-on-one, individualized care that is designed to help children meet developmental milestones and improve their mobility and/or function.

Our **Speech-Language Pathologists (SLPs)** work with children who exhibit speech or language disorders to improve their verbal and/or nonverbal communication skills.

Our **Feeding and Swallowing Disorders program** involves an assessment and an interdisciplinary treatment approach. Assesses and treats the full continuum of the feeding process, including the sensory, oral motor, and swallowing components.

PEDIATRIC THERAPY PROGRAMS

ABOUT US

Our program provides **occupational therapy, physical therapy, and speech therapy** for children of all ages, from infancy to adolescence. We address each child's cognitive, physical, communication, and developmental needs.

Our **dedicated therapists work collaboratively** with each child's family support system, medical team, education team, and others as needed to ensure a well-rounded program.

**ALL ABILITIES.
LIMITLESS POSSIBILITIES.**
